6.FAQ

Q: Why the basic information doesn't appear on the screen?
Solutions:
1) Please re-connect this unit with HD TV.
2) to make sure the signal source is strong enough.
3) to make sure power supply meets 5V/2A standard.

Q: Dull, delay cast or stuck screen or failure in casting MP4 or in finding the iPazzPort Cast interface, why?
Solutions:
1) Please restart your phone or back out other background programs.
2) make sure there is no hindrance or blocking wall among Router, phone and iPazzPort Cast.
3) Please test and debug it within 3-5 meters.

Q: Can't connect the phone with iPazzPort Cast, why?
Solutions:
1) Please restart your phone or restart the iPazzPort Cast with a long press on the button"FN".
2) Please make sure you have clicked the correct icon of the available iPazzPort Cast instead of other wireless signals amid the signal list after you open WIFI on your phone.)

Q: Fail to cast picture, MP3 on your iPhone to the HD TV scree, why ?
Solutions:
1) Please check what is the version of your iPhone. (some functions are confined to iPhone version)
2) Please turn to mirror function if your phone version is under 7.0

Q: There are frozen images when casting contents through a third-party App.
Solution:
Try another App.
